Q1: JAVA OOPS - Class and Object Creation

A. Car obj = new Car();

B. Car obj;

C. Car obj = Car();

D. obj = new Car();

Correct Answer : Option A

Your Answer : Option A

Explaination : In Java, an object is created using the new keyword with the constructor of the class. Car obj = new Car(); is correct.

Q2: JAVA OOPS - Accessing Object Members

A. 0

B. 10

C. null

D. Compilation Error

Correct Answer : Option B

Your Answer : Option B

Explaination : The object t accesses the member variable x of the class Test. The value of x is 10.

Q3: JAVA OOPS - Default Constructor

A. Compilation Error

B. Default Constructor

C. Parameterized Constructor

D. Abstract Class

Correct Answer : Option B

Your Answer : Option B

Explaination : Java automatically provides a default constructor if no constructor is explicitly defined.

Q4: JAVA OOPS - Object Reference Assignment

A. 5
B. 10
C. Compilation Error
D. 0

Correct Answer : Option B

Your Answer : Option B

Explaination : d1 and d2 refer to the same object in memory. Updating d2.a also updates d1.a.

Q5: JAVA OOPS - Object Creation Syntax

A. Car c1 = new Car();
B. Car c2;
C. Car c3 = Car();
D. Car c4 = new Car();

Correct Answer : Option C

Your Answer : Option C

Explaination : Car c3 = Car(); is invalid syntax; new keyword is required to create an object.

Q6: JAVA OOPS - Class Member Access

A. 10
B. 20
C. 30
D. Compilation Error

Correct Answer : Option C

Your Answer : Option C

Explaination : The sum of a.x (10) and b.y (20) is 30.

Q7: JAVA OOPS - Multiple Objects

A. 0
B. 1
C. 2
D. Compilation Error

Correct Answer : Option A

Your Answer : Option A

Explaination : Each object has its own copy of instance variables. c2.count is still 0.

Q8: JAVA OOPS - Object Null Reference

A. Prints Hello
B. NullPointerException
C. Compilation Error
D. Prints nothing

Correct Answer : Option B

Your Answer : Option B

Explaination : Accessing a method through a null reference throws NullPointerException.

Q9: JAVA OOPS - Object Initialization

A. Objects must be initialized before use
B. Objects cannot have methods
C. Objects are always static
D. Objects are primitive types

Correct Answer : Option A

Your Answer : Option D

Explaination : Objects must be initialized using a constructor before calling their members.

Q10: JAVA OOPS - this Keyword Usage

A. Refers to class name
B. Refers to current object
C. Refers to parent object
D. Refers to static variable

Correct Answer : Option B

Your Answer : Option B

Explaination : this refers to the current object, often used to resolve naming conflicts between instance variables and parameters.
